ABOUT ME

Ciao! I'm Andrea, I'm a Full Stack Engineer with a Front End focus and a vibrant passion for tech and design. I crave the satisfaction of solving complex problems, so that's why I am so passionate about coding! I would love to work in a multicultural environment in order to meet people from different cultures and share great moments with them! I work hard to build great features that I can be proud of, without forgetting to be humble and taking my responsibilities. As I like to say: in life, you win and you learn!

EMPLOYMENT HISTORY

FULL STACK DEVELOPER, LASCAUX SRL (AREZZO, TUSCANY, ITALY)

September 2019 - Present

- Developed and engineered many web applications for Italy's top banking and precious metals companies, ranging from complex architectures with as much as 14 micro services to standalone web apps.
- Created and maintained 2 Angular libraries for company-wide use on multiple projects.
- Held lessons on Lascaux's Academy for fresh grads, teaching Java EE, Web services, and REST/SOAP. Mentored various interns and junior developers.
- Lead developer on a pilot project commissioned by a very important client, which enabled the company to build a relationship with said client and get more projects

EDUCATION

DIPLOMA IN ICT, ITT G. FERRARIS (SAN GIOVANNI VALDARNO, ITALY)

September 2014 - July 2019 (5 school years)

- Graduated with a score of 92/100
- Specialised in Information & Communication Technology
- Tackled computer science related subjects: Programming, Algorithms, Networks, Project Management
- Participated in Italy's Robocup Junior 2018, writing our robot's path finding script
